My Projects

Docile	Docile is a UI Framework for React Native. Allows you to code React Native like Bootstrap codes. Docile is available on npm.
BiSosyal	I was Co-Founder and software developer of BiSosyal. I built it with React Native, PHP and MySQL. Also I used HTML,CSS and JavaScript for website. We had about 6000 active users and 52 sponsors in Ankara.
HitApp	I built HitApp for Hacettepe Management Club. I used React Native, PHP and MySQL for this application. It is still available on App Store and Google Play Store.
Formlayn	I built Formlayn with React Native and I used SQLite for database. Also I used Redux and Redux Thunk. This is an offline form application for IOS. I built this application for student clubs to recruit members more easily. It is still available on App Store.
Hungry Bear	This is a food delivery mobile application. I built this with React Native, PHP and MySQL. Also I used Redux and Redux Thunk. Actually this was going to be my company, but I could not find investment. So I shared the codes on GitHub so that other people can benefit.

Work Experience

4A Labs Mar, 2021 - Current	React Native Developer I developed two mobile applications. These are 321 and Yapbitakas. I developed them with React Native also I used TypeScript, Redux, Mobx-State-Tree and react-native-elements.
Glocalzone Dec, 2020 - Feb, 2021	Junior Frontend Developer I built new web pages with React.js, Netx.js, styled-components and I used GraphQL for database queries. Also I was responsible for fixing bugs on the website.
BiSosyal Bilişim Bilgisayar Teknolojileri Ltd. Şti. Sep, 2019 - Apr, 2020	Co-Founder I built web site and mobile application for our company. I used HTML, CSS, JavaScript, React Native, PHP and MySQL. And also I used OneSignal for mobile notification. I was only responsible for all software work of our company. I was also involved in some critical marketing activities.
JotForm Jul, 2019 - Aug, 2019	Web Development Intern I built two projects during my internship. Firstly, I built Cv builder with React Native and JotForm API. Secondly, I built a website that converts pictures into form with React.js and Python.
JotForm Jul, 2018 - Aug, 2018	Marketing Intern My internship's main topic was online marketing. I did research using tools such as Semrush and Goole Analytics related to SEO and content marketing. As a result of the research, I prepared a report and made a presentation to the department of the marketing.
