

## SUMMARY OF SKILLS

---

I am a mobile developer. I have experience about React Native for three years. I took part in 11 mobile app projects using expo framework or vanilla RN. I am highly motivated with strong work ethic. I am also a self-starting person so I can learn anything quickly and this is my best strength. In addition, I have good communication skills.

## WORK EXPERIENCE

---

- React Native Developer

Ankara, Turkey

August 2018 – Present

**Spor İzle:** This is the official app of Turkey Sports Ministry shows the nearest amateur sport events on map.

<https://play.google.com/store/apps/details?id=tr.gov.gsb.sporizle&hl=tr>

<https://apps.apple.com/us/app/spor-i-zle/id1441339929>

**Dismoni:** Dismoni is a discount monitor app. I have begun app with expo framework and then have to eject from expo to pure RN for share extension feature. Later I have to upgrade RN version 54 to 60 for google play 64-bit requirement. I used firebase notification, crashlytics, analytics.

<https://apps.apple.com/gb/app/dismoni-indirim-takip-sepeti/id1449131940>

**Mina:** The app was build for Turkish Red Crescent. The app used for entry of some information about their donations online and offline. The app was not distributed publicly.

**i-kort:** This is the official app of Turkey Tennis Federation. The app is used for follow and participate in tennis events for players, referees, trainers and clubs. It has pretty design.

<https://apps.apple.com/tr/app/i-kort/id1465587429?l=tr>

**Baskent Mobil:** This is the official app of Ankara Municipality to follow services and announcements.

<https://play.google.com/store/apps/details?id=tr.bel.ankara.baskentmobil&hl=en>

<https://apps.apple.com/tr/app/ba%C5%9Fkent-mobil/id1492899617?l=tr>

**Cloud City Information System:** The app is part of Inspire Cloud Platform Project that co-financed by the European Union and the Republic of Turkey. The app consist of four modules: Land Title, Numbering, Environment and Park. The app will use for draw point, line, polygon, etc on the map and enter information about them. React-Leaflet library is being using for drawings on web part of this project and we show the map via webview. We built bridge between webview – react native app (by using JS injection to webview) for react-leaflet map and app communication. We use redux for data management. Furthermore, the map has offline mode to view and change geometric and verbal data of objects. The project has finished but the mobile app has not published yet.

## EDUCATION

---

- Bilge Adam Microsoft .net Developer Bootcamp  
300 Hours Offline Course( C#, MS SQL, HTML, CSS, JavaScript, Bootstrap)

Ankara, Turkey  
2018

- Istanbul Technical University  
Bachelor of Engineering in Computer Science.

Istanbul, Turkey  
2007 - 2008
