

Yılmaz DOĞAN

I am a final year Computer Engineering student. I have always taken steps to improve myself in various fields. Since I am not a one-sided character, I always give opportunities to my hobbies. During my education life, I prepared php and sql based websites for corporate companies. I got job offers from sites like Bionluk. I gave basic programming lessons to Middle School students in a Private Course. I prepared projects on C and C++ languages. I supported the programming lessons of university students. Besides, I am interested in music. I studied Acoustic Guitar and Flute. I took the stage with Side Flute in Culture and Art Centers. I made music in various venues. I did not want to be left behind in my desire for sports. I have been doing fitness for many years. At the same time, I continue my education life.

CAREER OBJECTİVE

In accordance with the title I obtained at the end of my engineering education, I want to advance in the IT sector in accordance with the career stages in middle and senior management. Transferring my knowledge and experience as an engineer in the field as a manager is suitable for my qualifications.
