Experience

Senior Software Developer Alpata Teknoloji

21.08.2019 – 01.03.2021 Eskişehir

In Alpata, i've been working with significant industry companies and on their needs. Projects I involved in.

-Hasar Yönetim Sistemi(Hun İnşaat) : A system that keeps the status and information of the damage records transferred from a center to the dealers through this system, and instantly informs the experts and file officers about these records.

-ALP Satış Uygulaması(Alp Havacılık) : The application, which is connected to the supplier portal, used by the purchasing and warehouse departments, offered the features of issuing and reporting work orders to the departments and following all the status of the work order.

-Malzeme Yayınlama Sistemi(Alp Havacılık) : The system that creates a roadmap of the materials required for production teams

-Malzeme Tesellüm Sistemi(Alp Havacılık) : manages the delivery relations of Alp Aviation within their warehouses.

-Proje Yönetimi(PEK Makine) : System that provides work and project plan management to the teams. man / hour based, specific for each machine.

-Ticaret Borsaları : I provided web and api development support to the commodity exchanges of many cities in Turkey.
