## ABOUT ME

A Software Engineer with 2+ years experience in backend development. Experienced in serverless backend, working intensely with AWS services last a year. Worked with Express framework, writing Unit tests using Jest, Mocha. Formerly worked as a Software QA Engineer before experience of development, so knows about testing methodologies and knows how important it is.

## EXPERIENCE

### *Software Engineer* - **Faselis**, Istanbul/TURKEY

November 2020 - ...

Faselis is the most innovative online press release distribution platform. I work on the web app named as Myra. Design is ready for this project but all the application developing from zero and I manage the development process of Myra. Backend is developing by 2 people including me but Frontend side just on me. Our stack is almost completely serverless, using many AWS services, especially AWS Lambda, Amazon API Gateway, Amazon S3. Database is primarily DynamoDB and also MySQL. On the frontend, I develop with ReactJS and Context API.

### *Backend Developer* - **BiSU**, Istanbul/TURKEY

September 2019 - November 2020

BiSU is a startup having a mobile application that aims at making it easier for people to order water. I'd been working for new version of the application backend with Node.js/ExpressJS. I wrote a lot of unit tests and managed the manual testing process. Also, there was a web application that uses Python, I developed reporting calculations on that and I also developed backend that segmentate the users by grocery shop orders by users, I was using MongoDB for reporting and segmentations, using MySQL for records of users, orders and etc. and I'd been using Sequelize as an ORM.

### *Software QA Engineer* - **HepsiEmlak via Keytorc**, Istanbul/TURKEY

January 2019 - September 2019

I was working at MyAccount domain at HepsiEmlak. I did test preparation and execution using TestRail. Also, I did performance tests using JMeter. I used Cypress for test

## SKILLS

#javascript, #node.js,  
#aws, #lambda,  
#apigw, #dynamodb,  
#expressjs, #mysql,  
#sequelize, #mssql,  
#reactjs, #git, #jira,

## LANGUAGES

ENGLISH

TURKISH

automation. I'd been using Bitbucket for tracking automation scripts and project source, Jira for the defect and pipe tracking.

### ***Software QA Engineer - Vodafone via Wipro, Istanbul/TURKEY***

September 2017 - January 2019

I was working at CRM domain at VF telecommunication company. I did test preparation, execution and project tracking. I used Jira for the tracking and also used HP ALM for the bug tracking. I wrote database queries intensely on an MSSQL database. I worked in four phases of ULM(Unified Lifecycle Management) project. I tested ICCB, ICRM, LDM Projects and I also been in Digital Welcome project.

### ***Software Engineering Intern - SabanciDx, Kocaeli/TURKEY***

January 2017 - MAY 2017

I worked as an intern for 4 months. I worked on side projects like XSLT Generator. This was an e-signature desktop application. This application generates an e-signature document. Also, I read documentation of Elasticsearch and practiced about that.

## **EDUCATION**

### ***Software Engineering -Celal Bayar University, Manisa/TURKEY- 2.59/4.00***

2013 - 2017

### ***Karamursel Anatolian High School, Kocaeli/TURKEY 2009 - 2013***
