SKILLS

HTML5, CSS3, JavaScript, jQuery, AngularJS, React, Firebase, Webpack, Grunt, Bootstrap4, JIRA, Agile, Scrum, Adobe Photoshop, Adobe Illustrator, Adobe XD, Sketch

CAREER BACKGROUND

Senior Front-End Developer / Front-End Team Leader

Inveon | 01.2020 - still working

I decided to start working on a big scale company like Inveon. Which is providing e-commerce software and solutions for major merchants in Turkey. I joined a 3 person frontend development team. After 4 months team expanded and I became team lead. Now I lead 6 developers and counting. We develop new projects and support live projects. Our current Development environment is MVC .Net. Company also wants to use new technologies as React and .Net Core. In this objective we are working to improve our React skills.

Senior Front-End Developer / Front-End Team Leader

Etts Elektronik | 11.2012 - 01.2020

I started as Frontend Developer here. Also supported as Graphic Designer and UI Designer. After four years I became Frontend Team Leader and started to lead team which includes two Jr. Frontend Developer and one Graphic Designer. Since I started here Amerikadaniste.com and related web projects were main working area. Co-operations with major bank companies were also big part of my job. We developed loyalty projects and short term campaigns. We use agile methodology for development. So they decided to give me Scrum Master title because I was the most experienced employee there.

Web Development Specialist

Morkravat (Dijital Reklam Ajansı) | 05.2010 - 05.2012

I started as Flash Developer there. We developed micro sites, games and some other fancy things there. That was most challenging part of my career. I had improved my ActionScript and JavaScript experience with that challenging tasks.

Computer Trainer

Kozyatagi Kultur Merkezi | 01.2009 - 06.2010

Master Trainer at Graphic & Web Design Course

Lecturer

Akademi Neo Medya Ve Sanat Okulu | 11.2008 - 05.2010

Master Trainer at Graphic & Web Design Course

ACADEMIC BACKGROUND

MAJOR PROJECTS I'M INVOLVED IN

InCommerce

2020 - ...

InCommerce is the e-commerce software created by Inveon. Major brands in company's portfolio use this software in their online platforms. I also develop and support projects by this software as well as my team. We use vanilla Javascript, Bootstrap, jQuery, SASS and Grunt for bundling.

Amerikadaniste.com

2012-2019

I worked on this project as Front-end Developer, UI/UX Designer and some other positions as needed. In 2013 product owner decided to upgrade website and we developed desktop, mobile versions separately. I used jQuery mostly. After 5 years we started to work on new version which is completely responsive. The new project is Bootstrap 4, AngularJS and Webpack based according to capabilities of developers' who I leading. You can see v4.amerikadaniste.com for new project which is still in progress. I also designed Amerikadaniste APP interface.

Shippn.com

2016-2019

I was responsible of UI/UX design of this project. Also I developed Front-end of first version. We started with Bootstrap 3 and AngularJS to the project. I used Grunt for building Front-end structure. Now product owner considering to use latest technologies. So we started to learn React as Front-end Team.

Oksijenkampanya.com

2017-2018

We created a micro site for Odeabank loyalty project. My company planned and managed this platform. I developed Front-end of client, admin and merchant interfaces. I used Bootstrap 3, AngularJS in this project.

MasterCard MCE App UI Design

2017-2019

My company started to work with MasterCard in Eastern Europe region for mobile payment apps. I designed apps which we develop for 3 banks.

GamerCard

2019

A loyalty project for young gamers with Paycell (Turkcell). I designed and developed management platform of the project with Bootstrap 4, AngularJS and Webpack.
