## SUMMARY

I am a passionate UI/UX designer, with experience in both print and digital media for over 10 years.

I have focused on UI/UX in recent years, but I also have experience in other stages of graphic design. I actively follow new technologies and design trends and aim to quickly apply them to our projects. I am a strong believer in the critical need to continuously change for the better and pick up innovations. I actively use platforms such as Youtube, Medium, Dribbble, Behance, and Muzli to follow the developments in the world. I also take online courses from Udemy and other similar platforms to improve my technical skills.

In addition, I have been mentoring many people in UI design and design applications in the Design Ghost platform since it has started up.

**Programs I professionally use:** Figma, Sketch, Adobe XD/Illustrator/Photoshop, Invision, Zeplin

## MY PROJECTS

### GKFX Prime App

[Show project](#)

GKFX Prime App is an application that can trade in Forex markets. I used Adobe XD application while developing this application. In this study, I contributed to the development of the project by doing UI design, Wireframing, and Prototyping.

### GKG Web site

[Show project](#)

I updated the Global Kapital Group website design. I updated the site interface with a more modern and simple structure. I made UI/UX design using Adobe XD program.

### DKTRADE

[Show project](#)

I was involved in the creation of the brand and the design of the website. I developed web and mobile designs using Adobe XD.

## EXPERIENCE

### Principal Specialist UI/UX Designer

June 2021 - September 2021

ETIYA Bilgi Teknolojileri, Davutpaşa/Esenler

ETIYA is a company that provides software and design services in the telecommunication sector.

#### Responsibilities

- Producing designs by atomic design principles
- Creating design systems
- Making site design focused on the Bootstrap structure
- Designing UI that improves user experience

#### Achievements

- I suggested my team use Figma. I informed the team about the strengths of this program such as prototyping, presenting, and working together. In this way, we made the project we worked on as a team more successfully ready for presentation.
- As a team at Figma, I established a design system and contributed to the development of the project infrastructure.

#### Used technologies

Sketch App - Figma - Illustrator - Photoshop, Zeplin

### Sr. UI/UX Tasarımcı

November 2015 - May 2021

Global Kapital Grup (GKG), Maslak/Sarıyer

GKG is a global online trading provider, established in 2010, offering its clients a wide range of trading products.

#### Responsibilities

- Design website focused on Responsive and Bootstrap
- Microsite, Landing page design
- Design UI/UX for App Store and Google Play
- UI/UX design

#### Achievements

- I introduced the design team to various design tools such as Adobe XD, Sketch, Zeplin and we started using them. Mailing, Application, and web design projects were moved to these platforms. We included a wireframe before the design phase and prototyping before the publication phase. These programs provided our team with time design and performance efficiency of more than 80%.
- With the start of using the Zeplin, we have eased the flow from the design to the front-end part and prevented serious errors such as time and design inconsistency.
- In 2020, to close the technological gap of our design team and ensure its up-to-dateness, I contacted the relevant people and ensured the transition of the entire design team to the Mac platform.

#### Used technologies

Sketch App, Adobe XD - Illustrator - Photoshop, Zeplin, Marvell App

## **Sr. Grafiker**

**January 2012 - April 2012**

### **Bilgin Pro, Merter/Güngören**

Bilgin Pro is a company founded in 2012 that provides design and software support to its customers on digital platforms.
