

# CANER KOÇAŞ

Front End Developer

## ABOUT

My interest in the software started with the Web Programming courses I took during high school. With the software courses I took at the university, I decided to develop and work entirely in this field. I constantly work and develop projects in the Front-End area, which I enjoy while developing and think that I am successful. My goal is to be an innovative, continuously learning, sharing Front-End developer who is good at his job.
