Address:

Qualifications

I am a front-end-based web application developer. My main principle is "treat others as you would have them treat you"; therefore, I am taking every project seriously and giving my customers feedback every week.

I am mainly working with the MERN stack.

Here is my skillset:

- React | Redux | NextJS
- NodeJS | ExpressJS | NestJS
- HTML5 | CSS3 | SCSS | Bootstrap | TailwindCSS | Styled Components
- MySQL | MongoDB
- PSD to HTML
- Template Markups
- Unit Test

I've used these tools/technologies while working on my projects:

Git, Github, Redux, ESLint, Prettier, Yarn, Npm, and much more

My Github repo is here (You can find project links in every projects' readme.md files)
