EXPERIENCE

Whoa!, London England — *Developer*

3MONTHS-Full-Time

I was tasked on upgrading and adding new features to softwares

Africa Xyz, Kigali Rwanda — *Software Developer*

5MONTHS-Full-Time

I was tasked on researching, designing, implementing, testing and managing software's

developing modification and hosting software

Logic Coded, Kigali Rwanda — *Software Developer*

2MONTHS- Contract

I have worked on the Smart Coding extension which is the first co-developers code editor extension that gives developers access to simple, reusable & easy to customize feature & functionality code snippets written by other experienced developers worldwide. Our vision is to build a collaborative platform where developers can build any technology of their dream by using solutions and reusable codes written by others directly from their editors

Andela, Kigali Rwanda — *Software Developer trainee*

3MONTHS- Internship

Demonstration of my technical ability by solving coding challenges created by the topical experts,

It was also a blend of technical and soft skills training that is essential for thriving professionally in any work environment, especially when working with a distributed team
