Isahan Oncel

Front End Developer at Neredekal.com
İstanbul

Özet

Working on React, Node, Express, Php and Mongo

Isahan is an experienced full-stack web developer seeking opportunities to work on exciting web and interactive software projects with other creators and developers. Having worked on projects from web to mobile apps and responsive design, he is highly knowledgeable of multiple production pipelines and a master of the creative tools needed to achieve the best and most optimized results. He is passionate about full-stack app development and gives his time to mentor and train students from high school to university as well as to consult international institutions in their applications.

He is looking for collaborative and open for international opportunities, so please reach out to connect and talk about the projects that excite you.
