Strong engineering professional with a Bachelor of Science (BSc) focused in Software Developing, from Süleyman Demirel University.

Work history

Türkiye Finans Katılım Bankası

Java Back-End Developer İstanbul, Dec.2020 – Now

I have been working on TFXTarget which is stock exchange app of TFKB. We update it to the Microservice app design with using Spring boot and Kubernetes. I already knew Kubernetes before TFKB but I professionally experienced here. I keep trying to learn new approaches. I enjoy being here because I have the opportunity to try new things

SOLID-ICT

Java Back-End Developer İstanbul, Jan.2019 – Dec.2020

I have worked at Solid-ICT as Java Backend Developer. I worked most of back-end projects in Solid. I have worked alone on most of the projects. I mean creating the project and developing it from start to finish.

- 1) Digisupply (<https://www.digisupply.co>) for 7+ months. It's a Supplier Chain Application. I think it will take another 7 months. I listened the project that the client had created in mind and make it an application. Designed every point, from the creation of the database layer to the Http Endpoints.

- 2) Have worked on Turkcell's ArıKovanı (<https://arikovani.com>) application for 4 months. I continue to work on this project when someone asks me to do a task.
- 3) Have worked on TAV's LoungeMe (<https://www.lounge.me>) application for 2 months.
- 4) Turkcell's KimGblster (<https://yaani.kimgbister.com>) application as a Backend Developer. I designed every point, from the creation of the database layer to the Http Endpoints. This app actively has 400k users and will soon be increased to 2m users.
- 5) Turkcell's Dergilik (<https://dergilik.com.tr>) application as a Backend Developer for 3 months. I experienced kafka here.

Izibiz Information Technologies

Java Software Engineer, Istanbul October 2017– November 2018

- 1) I worked at Izibiz as Java Developer. In Izibiz we develop transformation of Government apps like EInvoice, EArchive and others. We usually code with Java, JSF Primefaces, Spring Framework and some xml-xsd-wsdl tech's
- 2) While working on these projects, I took many duties like packaging of project, testing and monitoring logs.
- 3) Finally I was working on ZReport app. I have been involved in every process from the creation of project to the installation

Technology Stack : Java 8, Spring Framework, Spring Boot, Spring Security with JWT, Spring DataJpa, Spring Cloud , Redis, Nginx, Linux, Docker, Kubernetes, Kafka, OAuth2, MySQL, GIT, JIRA, etc.

Education & Training

Computer Engineering BSc
University of Süleyman Demirel,
Isparta October 2013– June 2017

English Preparatory
University of Süleyman Demirel,
Isparta October 2012– May 2013
