

**Dear Authorized,**

After finishing my mechanical engineering education in 2016, I performed my profession as an engineer for a while. Afterwards, I had a long process to participate in the pilot training program of an airline company.

My education life provided me with the necessary infrastructure for your position. Besides, I have improved myself in organizational skills, analytical thinking, research, motivation, entrepreneurship or acquiring different skills thanks to the club activities I have done throughout my school life. As you can see in my resume, I prepared myself with the trainings I received and the research I did.

I participated in the Qualified Informatics Expert Training Program, organized jointly by the Bilge Adam Informatics Group and the Ministry of Labor. I learned Web and Mobile Programming under this program.

I would like to state that I want to take the responsibility required by the position on me, thanks to my ability to learn and adapt easily in my educational life. As both an analytical thinking perfectionist and an individual who respects demands and is prone to teamwork I think I can contribute to you with my talents and discipline.

While I am looking forward to your valuable returns, I invite you to review my CV in more detail.

**Best Regards,**

**Osman Şahin**
