SUMMARY

I graduated from the Computer Programming department and English Language and Literature department. As Full Stack, I have coded many web applications and websites. I specialize in PHP. I am currently working as a Team Leader and Project Manager.

CURRICULUM VITAE

I graduated from the Computer Programming department with a score of 3.8/4 as the top of the university. At the same time, I graduated from the English Language and Literature department with a score of 3.1/4. While studying at the university, I developed many applications with C# to improve myself.

After graduating, I started to work professionally and developed web applications by specializing in php and php frameworks like CodeIgniter. For 1 year in an agency, I both managed and coded projects from a to z. Frontend and backend coding is completely mine.

Then I started working as a full stack in a different agency. I continued to develop web applications using php (CodeIgniter) , and I coded websites that based on Wordpress and their themes and pluggins belong to me.

I am currently working as a Team Leader and Project Maneger at the agency I work for.

Along with these, I developed websites and web applications as a freelancer. I'm still coding One of the web applications.

EXPERIENCE

2018 – 2019
