Yunus UYANIK

Database Consultant, Certified MongoDB DBA
İstanbul

Özet

I am a Microsoft SQL Database Consultant. I have been providing
performance solutions to my clients who need their SQL servers to
run faster. Also, I work with MySQL and MongoDB and I have been
providing performance solutions to them too.

Deneyim

Silikon Akademi
Database Consultant
Nisan 2019 - Present (2 yıl 2 ay)

I am managing SQL Servers belongs to leading companies.

• I have been providing performance solutions to our customers.
• I determine and troubleshooting the complicated SQL Server performance
problem.
• I have been providing/setup complicated High Availability and Disaster
Recovery solutions.
• Also, I work with MySQL and MongoDB and I have been providing
performance solutions to them too.

IBM
Senior Database Administrator
Ekim 2018 - Nisan 2019 (7 ay)

CicekSepeti.com
Senior Database Administrator
Aralık 2016 - Ekim 2018 (1 yıl 11 ay)

I managed the live Microsoft SQL, MySQL (RDS) and MongoDB databases
used by the projects.

• Administered production & test SQL environments which are serving to
website applications from end to end.

• Administered production & archive ERP databases (Microsoft Dynamics Ax) and performed performance tunings.
• Solved database related problems on production website by working closely with software developers.
• Experienced in working with Mirroring, Log Shipping and Replication systems.
• Implemented Auditing, LOGON, and DDL triggers on SQL Databases to prevent and report unauthorized user access on production environment and ERROR triggers to report and observe application errors.
• Solved problems for slow-running queries on SQL Server with creating missing indexes/statistics, rebuilding fragmented indexes, updating stale statistics and query rewriting
• Created data warehouse system on SQL and integrated it with the production database.
• Created complex ETL packages (SSIS & Talend) in order to transform & transfer data between production and datawarehouse databases.
• Data transfer to datawarehouse with AWS DMS.
• Establishing procedures and alarm mechanisms for the database tracking system.
• I created a script that reads the transaction log backup to get back the errors have been made.
• Managed and administrated MySQL production & test databases on Amazon Cloud & Google Cloud.

Technologies I have worked closely with:

• Microsoft SQL Server 2012 – 2016 - 2017
• Microsoft SQL Server 2017 on Linux
• MySQL
• Dynamic Data Masking (SQL 2016)
• SQL Query Store
• Parallel Query Processing
• Microsoft Dynamics AX (SQL 2012)
• SQL Server Integration Services (SSIS)
• Google Cloud SQL
• Amazon RDS, DMS, EC2, S3.

Ziylan Group
Database Specialist

Ağustos 2014 - Aralık 2016 (2 yıl 5 ay)

• Managed and administered 1700+ stand-alone store-side live databases and
1 cluster center-side live database.
• Led the database operation team on performance tunings, T-SQL
developing.
• Solved database related daily problems on the store-side live databases and
center-side live database.
• Created & Developed custom SSRS reports for the need of departments.
• Tuned SQL queries for application and internal reporting system.
• Solved problems for slow-running queries on SQL Server with creating
missing indexes/statistics, rebuilding fragmented indexes, updating stale
statistics and query rewriting
• The website was written in php for database operations.
• T-SQL Developing.
