I constantly try to improve myself in software development by learning technologies, concepts and developing projects. I love learning challenges and trying to solve problems.

WORK EXPERIENCE

JavaScript Developer Intern
KNS Information Technologies

07/2020 – 09/2020 | Istanbul

Worked on
- Developing features and fixing bugs in existing projects.
- Upgrading version of React Native apps.
- Developing Help Center web app as side project.

Gained knowledge and experience in Git, CI/CD, Pair Programming and debugging.

Tech Stack
Node.js, React Native, React.

Software Developer Intern/Part Time
Cyber Istanbul AS

03/2019 – 07/2020 | Istanbul

Worked on the full stack development of mobile apps, APIs, backend services, admin panels and publishing mobile apps.

Tech Stack
React Native, React, Node.js, PHP, MySQL, HTML/CSS/JavaScript

Projects
- UberSport - A mobile app that aims to travel as a driver or passenger in luxury sport cars in the city.
- Seyyah - A mobile app that users can view certain historical places on the map, and receive notifications when they get closer to them. By reading the content of that place and answering the questions, they earn points that they can use in bookstore.
- Test Avatarı - A mobile app where primary school students can dress their avatars with the points they earn from the questions they solve and see their rankings.

LANGUAGES

English **Turkish**

INTERESTS

Theatre, Piano, Entrepreneurship, Open Source Software

EDUCATION

Computer Engineering
Marmara University
2017 – 2022 | Istanbul

Ordu Science High School
2013 – 2017

SKILLS

JavaScript **React** **Node.js**

React Native **TypeScript**

Python **PHP** **Java**

PROJECTS

RaffleApp
- It is a mobile application that offers scattered raffles on social media on a single platform. I developed mobile app, REST API, admin panel and landing page for the project.
- Tech Stack: Node.js, React, React Native, MongoDB, HTML/CSS/JavaScript.

Meeth
- A mobile app that allows people to meet people close to each other by solving questions.
- Tech Stack: React Native, React, Node.js, PHP, SQL, MySQL, HTML/CSS.

Shift
- A mobile app to make it easier for employees and managers to prepare their weekly schedule.
- Tech Stack: React Native, PHP, SQL, MySQL.

Filexist
- A web app that allows people to easily share files with small or large groups fast.
- Tech Stack: Python - Django, HTML/CSS/JavaScript.
