Starting Date
04.2020

Ending Date
Still Working

Job Type
Permanent / Full-time

Job Definition
I make improvements in the SalesForce connected portal application used by the company in line with the needs of various units

(Inventory, Store, Backoffice, IT) For example;

Inventory Transfer, Approval, Return, Objection processes, Cargo Tracking System Integrations (MNG, Sürat)

Mobile Application Integrations (Services for mobile applications used by field teams)

The screens where the incoming cases for the Backoffice Screens will be updated are the screens on which they search.

Organization of store sales and return transactions and system integration in connection with inventory

IT office365 - Salesforce Integrations (mail information is updated when updated in SF)

Technologies used PHP, Rest, Soap, Html, Css, Javascript, Jquery

Production

Starting Date
10.2017

Ending Date
04.2020

Job Type
Permanent / Full-time

Job Definition
I was interested in the company's IT and Software business.

Software: Intranet CMS (content management system encoded with C # - (I made updates and additions for the company information, the work in the market, casting agencies, and the information of the players).)

I developed a content management system where contracts are scanned and archived (Laravel)

For Optimus Consulting company, the partner of the company, I made additional improvements for the hocalarageldik.com site. (Guidance system, Quiz system, Api Integrations, Question Solution System, Exam Simulation ...) Technologies Used (Php, Phalcon, Memcached, Html, Css, Javascript, Mysql)

At the same time, I coded a mobile application with the name of Milses (I developed a service with PHP and provided a database connection with Framework 7 Infrastructure and angular js Html Technologies with the cordova framework)

I worked for Backend and mobile integrations for a VOD platform called Lim10Tv, (Not Completed)

I developed a site for limonproduction.com.tr (Laravel) (Not published)
