E-mail: kajay.ojha@gmail.com
Location: Bangalore, India.

Summary

- 17+ years of experience including software solutions and design, project management, consulting, client engagement, managed services, presales and vendor management.
- 10+ years of leadership experience on solution architect, operations, building teams and client services using agile/scrum methodology.
- Involved in entire IT phases, Applications (cloud, web, analytics, erp etc.) implementations & support.
- Ability to handle independent unit or division with team size 30+ resources.
- Solution recommendation & IT Roadmap for cloud implementation includes high availability, fault tolerance, scalability, database Concepts, system and software architecture, security, IT infrastructure, virtualization, and internet technologies.
- Implementing & supporting AWS, Azure applications based instances and services.
- Experience in creating solution design, implementation, solution delivery and documentations design in J2EE & cloud computing((infrastructure & services) for supply chain, pharmaceutical, manufacturing, and financial industries.
- Experience as technical architect for end to end system integration using service oriented architecture (SOA) and Microservices.
- Recruiting staff, training, and developing delivery leadership and individual contributor talent.
- Building knowledge, capacity and cross functional capability within teams, promoting a culture of continuous improvement using individual reviews & mentoring, conducting technical training, team presentation, brainstorming sessions etc.
- Provisioning CI/CD tools, IT automation tools, AWS & Azure automation services and Azure analytics service.
- Managed Enterprise applications implementation, up-gradations, change and incident managements(24/7). Applications migration, re-engineering, reverse engineering, applications integrations across system for organization. Managed services of cloud, Analytics and ERP projects.
- Actively participate in leadership meetings, demonstrate executive presence , presented & propose solutions proactively.

Skill

Management:

- **Project Management:** Guide the team in all SDLC stages, planning & execution of deliveries, risk management, review of milestones and delivery management. proficient in scheduling, resource management, forecasting and stakeholder management. Experience working on PMBOK, ITIL, framework. Handled projects in cloud, RPA, Devops, Enterprise applications and middleware applications. Proficient in development tools and concepts like CI, CD, IDE, OS, TDD, SDLC mythology including Waterfall, Scrum, Kanban, SAFe. Experience in managing multiple projects in parallel.
- **Agile Management:** Proficient in agile and lean practices, worked as product owner and scrum master role. Great collaboration, communication and presentation skill. Experience in scaled agile framework.

Technology:

- **AWS:** EC2, ECS, EKS, ELB, RDS, Route53, S3, CloudFormation, CodeBuild, CodeDeploy, Lambda, Functions, CodePipeline, Cloud adoption roadmap, infrastructure automation, migration strategy, VCP, security and compliance controls etc.
  No of implementation: 3
- **Azure:** Azure portal, network, storage, compute infrastructure & operations, AKS, active directory, Azure advisor, serverless architecture, Azure API, Azure migration, BC and disaster recovery.
  No of implementation: 1
- **OCI**: hypervisor, load balancer, storage, OKE, OCI API,SDK,CLI, service monitoring, autonomous database, hybrid cloud, migration, security etc.

No of implementation: 1
- **Devops:** Docker, Kuberenets, Jenkins, Ansible, webservices, js, angularjs, nodejs, shell script etc.
- **Java:** design patterns, UML, caching, microservices architecture, quality requirement, performance analysis , optimization, application security, j2ee, Spring Framework, Spring Boot, JPA , microservices, API, JMS, Active MQ etc.
  No of implementation: 6
- **Data Analytics:** Data summarization ,aggregation, missing value, data merging & transformation, analysis of variance, multiple linear regression, multicollinearity, analysis (factor, cluster, market basket), tree, NBC, KNNM, SVM. Splung, Appdynamic, Azure data objects, compute contexts, metrics, automated ML Interface, create, interpret and manage models, pipelineing.
  No of implementation: 2
- **ERP Oracle R12/SAP HANA integration**: Application implementation, rollout, migration, applications integration with third party applications, up gradation, custom application migration to open source application. incident and change management(ITIL framework).
  No of implementation: 4
- **Others Tools & Technologies**: Jira, ServiceNow, MS Project, Primavera, Artifactory, Docker Hub, Sonarqube, Cloud Foundary, Selenium, JUnit, Cucumber, PlanView, Git, GitHub, SVN, MS Visio, MS Office, Toad, SmartDraw, Eclipse, Microsoft Team, Confluence, Slack, Smartsheet, Oracle (SQL, PLSQL, EBS Technical), Oracle BI, SOA11g, Mule ESB, Mysql, MongoDB, UiPath, Python, R, spark etc.

Industry:
- **SCM** : Quoting, Proposals, Order Management, Inventory, Bill of Material, WMS, Shipping, Pricing, Purchasing, sourcing, Manufacturing, Projects, planning, execution.
- **Finance**: AP, AR,GL, Asserts, Revenue , Cash management, Credit Management.
- **Life Sciences**: Clinical Packaging, Clinical Labelling, MBR, EBR, Pharmaceutical process manufacturing, process execution, batch production of drugs, Protocol definition, protocol forecasting, inventory planning, net demand, analysis.
- **Oil & Gas**: Insulation, surface protection, passive fire protection ,refractory, interior outfitting,

Experience:

ABN Informatics As Sr. Manager since April 2018 to till date.
- Handling project management and solution architect for cloud and data analytics applications.
- Managed all aspects of development & delivery of technology solutions. Responsible for define and design solution offerings, solution development, solution scope includes ongoing delivery of services, service transition & process transformation and driving end-to-end technical solutions.
- support Agile-working practices. Enforce and improve existing Agile operating processes to maintain a strong focus on delivery priorities, holding others to account for delivery, and swiftly responding to changing requirements.
- Analyzed customer technology, requirement specifications, business needs and continuously collaborate with business and technical partners to deliver and mature the application roadmap by ensuring that the built functionality fully meets business requirements and quality expectations.
- Worked with various cloud compute, networking, storage, database, integration, monitoring, container, security and identity services.

SS Indus IT Valley As Sr. Principal Consultant from Nov 2013 to Mar 2018
- Managing EMEA & Canada customer project (Manufacturing & outsourced WMS programs) to looking up implementation of complex Vendor managed inventory, Order Management , Shipping and distributions, purchasing & manufacturing processes using secure web applications, cloud applications and mobile applications platforms.
- Facilitate sprint reviews and daily stand-ups for project progress, impediment removal, and to touch-base with whole team and ensure that all members were performing satisfactorily.
- Coordinate with different application teams also with SIT, UAT, Performance, Release, Configuration, and Production support teams.
- Manage project timelines and communicate with management staff, clients to ensure project progress satisfactorily, and making sure the project delivers on schedule, and within scope.

ASM Technologies As Team leader from May 2012 to Oct 2013.
- Led cross-functional team consists of consultants, QA, DBA, software engineers, and business analysts of 25+ resource distributed across different locations to design, develop and modernize web & enterprise system applications using J2EE and oracle technologies for SCM product.
- Experience in architectural design & improvements, reviewed solution design and analyzed application to resolve technical and performance issues. Worked on database design, web services connection pool and query optimization.
- Review the development progress by tracing back the design with development output.
- Review project plan documents, come up with project dates and drive the resources to get the projects completed on-time.
- Create and maintain related documents (project management, business requirement, functional, technical etc.) versions.
- Worked with teams at onsite and offshore to develop, test, implement and defect resolution.

SS Indus IT Valley As Sr. Technical Consultant/Technical Architect from May 2011 to May 2012.
- Managed all aspects of development & delivery of technology solutions. Responsible for define and design solution offerings, solution development, solution scope includes ongoing delivery of services, service transition, process transformation and driving end-to-end technical solutions.
- Engaged clients in identifying business needs while ensure clear understanding of existing functions and processes of financial services.
- Design and develop integration solution (SOA) based on j2ee, BPEL and ESB.
- Analyzed customer technology, requirement specifications, business needs and continuously collaborate with business and technical partners to deliver and mature the application roadmap by ensuring that the built functionality fully meets business requirements and quality expectations.
- Received many appreciations for successful go-live on time from various countries(USA, UK, China and Australia) business heads.

California Software As Sr. Consultant from Apr 2010 to May 2011.
- Leading on-site and off-shore SE, consultants and DBA of 15+ resources in building integration with Oracle EBS R12 with vendor's warehouse management products, last mile delivery management products and various other legacy applications.
- Analyzed customer technology, requirement specifications, business needs and continuously collaborate with business and technical partners to deliver and mature the application roadmap by ensuring that the built functionality fully meets business requirements and quality   expectations.
- Provided support and consulting services to customers on the integration solutions.
- Ensured excellent uptime for architecture , database , platform , and front - end applications for faster response time and 24 / 7 availability.
- Received many appreciations from business & management for solutions and 24/7 support managed services activities.

Aptuit Informatics As Software Engineer II from Nov 2006 to Mar 2010.
- Design & develop code in Oracle, Java and Microsoft technologies for complex life sciences product, which was used for pre clinical and clinical trials across sites and clinical supply chain processes.
- Worked as a development lead for product enhancement, conduct change execution sessions and provide development strategies for implementation of single blind and double blind randomized trial process in Clinicopia.
- Prepare build & release documents, CEP, RCA, TS, TP documents for various points & patches releases.
- I received many appreciations from various clients and core group management.

TimeSoft IT Solutions As Software Engineer from Feb 2006 to Nov 2006.
- Involved in Data modelling, back end, front end development, interface development, web services developments, unit testing, integration testing & system testing in Oracle D2k.
- Involve as onsite application lead for translating business requirement to functional cases, data migrations, applications setups, legacy integrations, test case design, execution and end user training in finance, project & order management applications implementation.

Softtech Solutions As programmer Sep 2003 to Oct 2005.
- Involved in frontend, backend development, unit, integration testing, application support and bug fixing for school management application and other legacy applications.

Educational Qualifications
- Masters of Computer Applications (MCA) from IGNOU New Delhi.
- Graduate (B.Sc.) in Science Stream(PCM) from Vinoba Bhave University.

Certifications
- Professional Scrum Master from Scrum.org.
- Certified Lean Six Sigma Green Belt from MSME TDC Chennai.
- Business Continuity from Project Management Institute.
- Agile in the Program Management Office from Project Management Institute.
- Foundations of Change Management from Project Management Institute.
- Microsoft Certified: Azure Fundamentals.
- Microsoft Certified: Designing and Implementing a Data Science Solution on Azure.
- Microsoft Certified: Microsoft Azure Architect Design.
- Certified Business Analytics From Indian Statistical Institute(ISI), SQC & OR Unit Bangalore.
- Oracle Cloud Infrastructure 2019 Certified Architect Professional from Oracle.
- Oracle Cloud Infrastructure 2019 Certified Architect Associate from Oracle.
- Oracle Cloud Infrastructure Developer 2020 Certified Associate from Oracle.
- Oracle Autonomous Database Cloud 2019 Certified Specialist from Oracle.
- Oracle Certified Professional (OCP) from Oracle.

Training:
- PMP Certification Training from MSME TDC (PPDCAGRA) .
- Analyzing Big Data in R using Apache Spark from IBM Cognitive Class.
- BPMN for business analysts from Udemy.
- Training of Certified Network Security Specialist from ICSI.
- AWS CloudFormation - Hands On with YAML From Udemy.
- Amazon Web Services (AWS) Certified - 4 Certifications from Udemy.
- Master Automation with Ansible and Puppet From Udemy.
- DevOps MasterClass : GIT Docker Jenkins Kubernetes Terraform From Udemy.
